ABOUT

Innovative software engineer with strong foundation in programming and problem-solving, proficient in multiple programming languages and software tools. Experienced in full-stack development. Agile methodologies and software testing. Proven ability to design and implement scalable, efficient and maintainable software solutions. Passionate about staying up-to-date with emerged Technologies and collaborations with cross-functional teams to deliver cutting-edge products.

EDUCATION

CDAC Diploma in Advanced Computing	Mar 2023 - Aug 2023
K.D.K. College of Engineering, Nagpur B.E. Mechanical Engineering	2018 - 2022 CGPA: 9.67

SKILLS

Java, HTML, CSS, JavaScript, TypeScript, Linux, C, C++, React.js, Next.js, Spring Boot, Node.js, Express.js, MongoDB, SQL, MySQL, Prisma, Git, GitHub, Tailwind, Material UI, Docker.

PROJECTS

1. Discord Server | [GitHub Link](#) |

- Developed an innovative user interface using Next.js, ensuring a seamless and visually appealing user experience.
- Implemented advanced real-time chat functionality with web sockets, enabling dynamic and responsive user communication.
- Utilized Prisma and Supabase for robust database management, ensuring data integrity and efficient data handling.
- Integrated PostgreSQL Clerk Authentication for a secure and user-friendly login system, enhancing platform security.
- Technologies:: **Next.js, Web Sockets, SQL, Prisma, Supabase**

2. ShopEasy - Ecommerce web app | [GitHub Link](#) |

- Designed and implemented an intuitive user interface using React and Redux, providing a seamless and user-friendly shopping experience.
- Integrated JWT authentication in Node Js for secure user accounts and transactions, ensuring a high level of data protection.
- Empowered administrators with effective product management and user oversight functionalities to streamline operations.
- Enabled key user actions such as registration, order placement, payment, and order tracking, contributing to an efficient and comprehensive ecommerce platform.
- Technologies: **React, Redux, MongoDB, NodeJs, JWT**

3. Disney Plus Clone | [GitHub Link](#) | [Live Link](#)

- Developed an intuitive user interface using React and Redux to mimic the Disney Plus platform, ensuring a user-friendly and engaging experience.
- Integrated Firebase for seamless data storage, authentication, and real-time updates, contributing to the dynamic and interactive nature of the application.
- Implemented JWT authentication for secure user accounts and transactions, prioritizing user data protection.
- Technologies: **React, Redux, Firebase, JWT**.

4. Flinx SaaS Web App | [GitHub Link](#) | [Live Link](#)

- Developed Flinx, a comprehensive white-label multitenant SaaS application, offering agencies and businesses an all-in-one platform for multi-vendor B2B2B management. Streamlined agency and sub-account management, funnel hosting, website building, and more, empowering users with a versatile and efficient solution.
- Implemented advanced features such as role-based access control. Integrated Stripe for seamless subscription management, add-on product handling, and application fee processing, enhancing control and efficiency for businesses and agencies.
- Designed Flinx with customizable funnel builder, full website funnel capabilities, and white-labeling. Users create stunning, conversion-focused content while maintaining brand consistency for seamless client experiences.
- Technologies: **Next.js, Prisma, Stripe, SQL**.
